OLYMPUS®

DS-7000

THE POWER OF SPEECH: EASY, MOBILE & SECURE

Designed for professionals who rely on secure, flexible, reliable recording solutions, the DS-7000 from Olympus sets new standards in efficiency and integration.

The DS-7000 allows users to harness the power of their voice to streamline workflows and promote organizational efficiency. A professional-quality microphone makes it easy to capture crystal-clear recordings, which are then encrypted and routed – *automatically* – to transcriptionists, voice-recognition software, archives or third-party apps. **It's truly revolutionary voice productivity.**

Features

▸ Includes Olympus Dictation Management System software

▸ Easily integrated with existing software, applications and workflows

▸ Transfer files via USB, cradle or remotely with a FlashAir™ SD card

▸ Real-time 256-bit file encryption and device PIN locking

▸ Precise slide switch control

▸ Awarded the highest level Dragon score (6) from Nuance

Use case:

Efficient transcription of depositions

The DS-7000 includes Olympus' industry-leading ODMS workflow software. This allows attorneys and other professionals to **automatically route dictation files** to transcriptionists or voice-recognition software as soon as they're finished recording.
